PROJECTS

Online Shopping Website:

Online shopping website to provide seamless shopping experience using React.js and MongoDB technologies for users and administrators, enabling product viewing, category filtering, cart and Wishlist management. Has admin panel for category addition, product updates, order viewing, and to delete deceptive users.

Role:

- Designing, developing, and maintaining e-commerce websites.
- Implementing front-end technologies (HTML, CSS, JavaScript) to create a visually appealing and intuitive user interface and optimize the user experience.
- Developing server-side logic, databases, and applications to support the functionality of e-commerce websites.
